

COASTAL STORMWATER CENTER OF THE SOUTHEAST

Addressing Stormwater Challenges & Building Resilient Communities

Technical Assistance

Working with state, Tribal, and local governments in the coastal service area to identify funding opportunities, deliver training, and implement effective stormwater strategies.

To apply for technical assistance scan the QR code or visit: www.bit.ly/CSCTAForm

Research & Innovation

Conducting regionally relevant studies to advance cutting-edge stormwater control infrastructure solutions.

Collaborative Partnerships

Partnering with universities, community groups, government agencies, and regional experts to connect coastal stakeholders with innovative stormwater approaches.

Led by the Center for Watershed Protection, the Coastal Stormwater Center of the Southeast (CSC) is one of EPA's four new Centers of Excellence for Stormwater Control Infrastructure Technologies established to advance critical stormwater solutions across the country.

To learn more about the CSC scan the QR code or visit: www.bit.ly/CWP-CSC
